AB	Riboflavine 5'-phosphate (I) was treated with butyric or isobutyric acid deriv. and the resulting 4',5'-cyclic phosphate hydrolyzed to give the 4'(or 5')-monophosphate, useful as H ₂ O-sol. vitamin B ₂ . E.g., 0.54 g pyridinium salt of I in pyridine was treated with 1.6 g butyric anhydride to give 0.65 g 2',3'-di-O-butyrylriboflavine 4',5'-cyclic phosphate; 0.61 g of which in EtOH was hydrolyzed with 85% HCO ₂ H to give 0.5 g 2',3'-di-O-butyrylriboflavine 4'(or 5')-monophosphate. Similarly prep'd. was 2',3'-di-O-isobutyrylriboflavine 4'(or 5')-monophosphate.
